– *False*

*Find the answers on the back!*

*Answers:*

**1) True**

Male gray wolves can reach 175 pounds, although in Washington State they rarely reach that size.

**2) False**

Wolves can run nearly 40 mph, while the fastest human sprinters barely break 25 mph.

**3) False**

Wolves are wild animals, and are very difficult to tame. Even dog/wolf mixes are unreliable and do not make good pets.

**4) True**

At birth, gray wolf pups weight 1 pound - about the same as 4 sticks of butter!

**5) True**

A wolf pack's territory can range over hundreds of miles to provide prey and safe places for dens. Wolves need large tracts of undeveloped wilderness
